Flexible fleet solutions

We are the UK's largest municipal and specialist fleet hire company, NRG Riverside has the skills, knowledge and expertise to support all your operational needs. Established in 1996, we've supported our valued customers to upgrade and decarbonise their fleets, save money and improve efficiency by reducing 'Vehicle Off Road' (VOR) time.

Contract hire (long-term hire)

Our customers choose NRG Riverside's contract hire solutions for their municipal and specialist fleets as it offers fixed monthly payments, reduced upfront costs, vehicle compliance, access to the latest vehicle technology and significant tax benefits.

Spot hire (short-term hire)

Our short-term hire services offer spot hire of 1 day to 12 months, We are continuously investing in our spot hire fleet to ensure we can offer the latest specification vehicles and technology to our valued customers.

Service and maintenance

With state-of-the-art workshop facilities and an in-house team of engineers, over 300 approved maintenance partners and a team of qualified mobile service engineers located across the UK operating 24/7, we have all the resources and expertise our customers need and are never far away.

Fleet management

With dedicated account managers, we are geared to respond to all your day-to-day needs and more. For expert advice on vehicle sales and rentals, upcoming legislation, fleet decarbonisation or sale and leaseback options, we can help.

Reliable vehicles

An ongoing programme of investment ensures that you get the latest vehicles, equipped with the most advanced technology. This approach, combined with our high service standards and regular maintenance, means you can rely on us to get the job done with minimised risk of downtime.

Added value

- 24/7-365 Customer service
- Flexible funding
- Reliable vehicles
- Fleet management
- Maintenance and repair
- Tyre maintenance
- Accident repair
- Electric HGVs

Flexible funding

Maybe you need a vehicle for just a day, or want it for several years. Either way, with a choice of spot hire, contract hire, or purchase and lease back, you have flexible, cost-effective options and we can help you identify the best approach for your operations.

Transparent reporting

During the course of your contract, state-of-the-art vehicle telematics and an online portal that delivers high quality management information, will give you the insight you need to support your Fleet Operator responsibilities.

90%

of calls answered
within 20 seconds

"We have used various vehicle providers in the past and NRG Riverside has the edge over them all. I have no qualms in recommending them to any other organisation looking to lease hire or purchase vehicles and/or use NRG Riverside to support their vehicles' compliance and ongoing maintenance"

Mike Burgess | Fleet & Plant Manager | Kellaway Building Supplies

Where you need us to be

Our ever-expanding network of depots and body shops are strategically located around the UK's primary arterial routes. All our technical centre operations are ISO9001 accredited and our workshops have IRTEC Workshop Accreditation.

Intelligent maintenance management

Our fleet management system is used to generate a vehicle's maintenance schedule incorporating the pre-planning of events weeks in advance facilitating effective planning for our customers to minimise vehicle and operational downtime and keep 'O' licences protected. Our teams will use historical and live data captured in the system to monitor trends within the service to understand where cost efficiencies and service improvements can be achieved.

Legal compliance

Your fleet's roadworthiness is a critical liability for your business, but frequent revisions to compliance legislation can make it hard for you to keep up. If we are fully managing your fleet, we take care of all the paperwork, logs and reporting involved in legal compliance and make the information available to you through our bespoke, secure customer portal.

Buying power

With our buying scale comes strong relationships with our supply chain, which deliver significant cost savings that we pass on to you. It also means that parts are available when and where they are needed, minimising vehicle downtime.

24/7 roadside assistance

As a fleet management customer, you have the reassurance of knowing that if an asset breaks down or is involved in an accident, our in-house team is there to support you and your drivers. All incidents are assessed and specialist services deployed if required. We keep you fully updated via our event and incident management systems.

Facilities management

As required, we can develop or take over the running of your maintenance facility. We are experienced and sensitive with TUPE arrangements, and can carry out transfers seamlessly.

This is a snapshot of vehicles available on contract hire. Enquire to learn more.

Tyre management for safety and savings

Our strategic partnership with Direct Tyre Management (DTM) gives you direct access to services that help optimise your productivity while reducing your costs and carbon footprint. Using the most advanced management information system in the UK tyre industry, DTM helps fleet operators to meet their SLAs and environmental responsibilities.

Suitable for fleets of 10 or 10,000 vehicles

Including cars, vans, HGVs, buses, agricultural and construction plant and more.

Not aligned to any tyre manufacturer

We will even conduct tyre trials in your operating conditions and terrain, to select the most robust tyre for the job.

In-house 24/7 customer service

Calls answered in seconds, jobs actioned in nine minutes, vehicle back in service within 60 minutes.

Environmental responsibility

Lowering your carbon footprint and supporting your efforts to reduce landfill by optimising every tyre's useful life and minimising wastage.

Largest UK service partner network

2,400 accredited service providers, supporting customers across UK, Ireland and Europe.

Proactive approach

Using fleet audits, network-to-network alignment and intelligent stock predictions to deliver preventative maintenance and avoid vehicle downtime.

Data insights from live MI

At vehicle, tyre and driver level, recommendations and actions to lower costs and increase safety.

Training

Toolbox Talks to inform and support your drivers and operating centres, improving safety and compliance.

Alternative fuels

With governments around the world setting ambitious targets to reduce carbon emissions, We can offer cost effective options that will deliver a better future today.

Electric

These vehicles are designed to offer a reliable and efficient alternative to traditional heavy-duty diesel trucks, while also delivering significant cost savings and reducing environmental impact. With advanced battery technology and state-of-the-art electric powertrain, electric HGVs are capable of achieving impressive performance and range, making them an ideal choice for a wide range of applications. As one of the first municipal hire businesses to supply EV HGV, we can help you design your perfect fleet and facilitate the charging and maintenance infrastructure needed.

Hydrogen

These vehicles use a fuel cell to convert hydrogen gas into electricity, producing only water vapour as a by-product. They offer significantly reduced emissions, improved air quality and quiet operation. They also offer long range capabilities, making them a suitable choice for long-distance transport. We can help you design your perfect fleet and facilitate the refuelling and maintenance infrastructure needed.

HVO

HVO (Hydrogenated Vegetable Oil) fuel is a renewable diesel substitute that is produced from waste products, such as cooking oil, and is virtually carbon-neutral. HVO fuelled HGVs offer a number of benefits, including reduced greenhouse gas emissions, and improved air quality, They also offer comparable performance to diesel trucks, with similar range and power capabilities and HVO is suitable to use in most diesel engines. We provide fleet telematics as standard, ensuring you have the environmental performance of your fleet at your fingertips demonstrating tangible benefits.

Reporting and Telematics

Class leading customer portal

Our live, web based system gives you secure access to an online portal and extensive reporting suite, where you can manage your vehicle fleet, tyres, compliance documentation and view up-to-date information.

Asset management

All breakdowns and defects are recorded, managed and monitored via RAMS. This Asset Management System has been designed specifically to enable us to manage mixed municipal and commercial fleets. With secure access 24/7, it also shows our service team and customers real time repair status and complimentary training is provided with all our contract hie packages.

Telematics

Our fleet telematics solution plugs into a vehicle's on board diagnostics (OBD). It provides accurate GPS tracking, vehicle health assessments, collision detection and notification, and offers intelligent in-vehicle driver coaching.

End of lease vehicle sales

We continually refresh our fleet so we have an ever-changing range of quality second hand general and municipal vehicles and equipment available for purchase. All have been well maintained by our skilled staff or approved third party providers and come complete with full-service histories.

Finance options

Ask us about how we could help spread the cost of buying a vehicle (subject to conditions).

We can help sell your fleet

With a global network of selected traders and end users we can dispose of your used fleet and help keep residual sale values up.

Join our Selected Traders List

Tell us what you are looking for and when we have something suitable, we will let you know before it goes on the market.

Vehicle variety

We sell more than just trucks, trailers, road sweepers and vans. If they pass through the NRG Riverside fleet, they could come up for sale, so check back regularly.
